autoloader workstations

Easy-to-use software

Durable build quality

Inkjet
Technology by  invent

The Infiniti brings professional print quality to in-house printing of CD's and DVD's, delivering outstanding photo-quality images directly onto the surface of inkjet discs, enabling users to choose backgrounds or images that best portray their organisation or disc content. The included 'CD painter' software promotes greater creativity.

The Infiniti features HP's unique PhotoREt IV colour-layering technology which is able to deliver vivid, true to life images. PhotoREt IV can deliver 289 levels of shade for each colour and offers a complete palette in excess of 1.2 million colours. The outstanding print quality is also achieved through the special drawer mechanism, which holds the discs in place to such a high degree of accuracy, that the sharpest inkjet disc printing can take place.

The Infiniti boasts a unique interface making it the easiest to use and most accurate CD/DVD printer by far. The Disc Mask ensures precision printing of designs time after time and the quick and simple calibration process ensures perfect layout. As a desktop printing solution, the Infiniti is ideally suited for the low to medium volume small business user. The Infiniti can be easily integrated with a CopyPro MiniMax or ProMax series autoloaders...
