The Infinity brings professional print quality to the in-house printing of CD's and DVD's, delivering outstanding photo-quality images directly onto the surface of discs enabling customers to choose colourful backgrounds and images that reflect their company.

The Infinity features HP's unique PhotoREt IV colour-layering technology which is able to deliver vivid, true to life photos. PhotoREt IV can deliver 289 levels of shade for each colour and offers a complete palette in excess of 1.2million colours. The outstanding print quality is also achieved through the drawer mechanism, which holds the discs in place to such a high degree of accuracy, that the finest (4pl) inkjet printing can take place.

The Infinity boasts a unique interface making it the easiest to use and most accurate CD/DVD printer by far. The Disc Mask ensures precision printing of designs time after time and the quick and simple calibration process ensures perfect layout. As a desktop printing solution, the Infinity is ideally suited for the low to medium volume small business user. The Infinity can also be easily integrated with a CopyPro MiniMax or ProMax series autoloader....
